

SILVER SHIELD AN INCREDIBLE PRODUCT AT A CRITICAL TIME!

**NEW
and
Exclusive**

Dr. Gordon Pederson and Kathy Deane DNM at NSP Seminar Yuma Arizona Jan 30th 2010.

NEW SILVER SHIELD LIQUID AND GEL

Dr. Gordon Pedersen, PhD in toxicology states that scientifically this new silver supplement is safe enough to consume every day while powerful enough to destroy the causes of many serious diseases like strep throat, staph, pneumonia, salmonella, dysentery and yeast.

The Simple Story on How Silver Shield Sol Technology works and More by Kathy Deane

When you understand the simplicity of how Silver Shield Sol Technology works you will be left in awe. What a brilliant down to earth man Dr. Gordon Pedersen is. I was so excited to think that here I was in Yuma AZ and was given the day to listen to this man speak from his heart on the wonders of Silver Shield with Sol Technology.

Did you know that...?

- Viruses, bacteria, yeasts and fungi can inflict terrible damage in the human body and be at the root of many diseases. **"By destroying bacteria, viruses, and mold, silver allows the immune system to focus entirely on building, healing and protecting the rest of the body."**-- Dr. Gordon Pedersen, world wide authority on silver as a medicinal property, Director of the Institute of Alternative Medicine.
- Antibiotics have served to make our diseases drug resistant. Scientists warn that new antibiotics and vaccines are barely staying ahead of drug-resistant pathogens. The Silver Sol technology used in Silver Shield is scientifically proven to destroy 99.99% of over 350

pathogens including MRSA/Staph infections, Influenza, Pneumonia, Malaria, E-Coli, Candida, Hepatitis C, and many more.

“TO DATE, THERE ARE NO POTENTIALLY PATHOGENIC BACTERIA TESTED THAT...(THIS) PRODUCT HAS NOT KILLED.”—DR. R. LEAVITT, PROFESSOR OF MOLECULAR BIOLOGY AND MICROBIOLOGY, BRIGHAM YOUNG UNIVERSITY

Silver Shield was released October, 2008 by Nature’s Sunshine Canada, which has been given exclusive distribution rights. In a few short months satisfied customers have reported many results.

Recently I had the opportunity to spend a one day seminar with which Dr. Gordon Pedersen was one of the key speakers. Dr. Gordon Pedersen is known to have developed over 150 health products but the miracle of all miracles is his development of Silver Shield with the Sol Technology. I have always believed in Dr. Pedersen’s Silver Shield and its potency in comparison to other competitors however I never knew how to explain it in a simple format to people so they could understand WHY IT WORKS AS IT DOES!!! Well I believe I FINALLY GOT IT!!!!

Before explaining the simplicity of Silver Shield first and foremost it is important for you to understand that our Natures Sunshine Silver Shield is confirmed by Dr. Pedersen to be his patented product. YES IT IS AVAILABLE TO US AND ALL OUR CLIENTS THROUGH NATURE’S SUNSHINE Business Associates.

Here are some highlights from Dr Pedersen’s Seminar - after many tests it has been proven that

1. Dr. Pedersen’s patented form of Silver Shield when undergoing scientific tests killed off 99.9% of most bacteria, yeasts, and molds that it has been in contact with, within just 10 minutes.
2. AND Silver Shield continues to kill pathogens with catalytic, not chemical action.
3. It can be used internally, as well as topically and is non – toxic and safe at recommended levels.
4. Even Former U.S. Air Force Surgeon General advocates the new sol silver technology. His comment was, “We currently do not have anything with such a wide spectrum of efficacy ... in our inventory.” He even went on to say that according to Dr. Carlton, the Aquasol technology “has under gone rigorous testing and has been found to kill anthrax, bubonic plague, hospital staph, and SARS” while still being non-toxic to humans.
5. Dr. R Leavitt, Professor of Molecular Biology & Microbiology, Brigham Young University states,” To date, there are no potentially pathogenic bacteria tested that this product has not killed.” Is this POWERFUL OR WHAT??????

So my question is how does the Silver Shield Work? Well first let’s take a look at the chemical structure of the Silver Shield.

CHEMICAL STRUCTURE

“The Silver sol particles are tiny enough to be absorbed into a single red blood cell. Pure Silver is super charged and surrounded by a chemical shell that is missing two electrons (called ionic because it carries a charge). This means the tiny silver particle wants to attach to the thin cell walls of pathogens and remove one or two electrons. This leaves a hole in the cell membrane and kills the pathogen. Normal cells have thicker, more protected cell membranes that have a balanced charge resulting in selective protection from the silver’s coating that kills bacteria on contact.

RESONANCE

“There are healthy and unhealthy resonances. For example, imagine a vibrating back massager compared to the jolting frequency of a jackhammer. In a similar way, silver resonates at a frequency selectively destructive to pathogens. In fact, it is the same frequency at which germicidal ultraviolet light resonates. Imagine now tiny silver particles that are small enough to be absorbed into the red blood cells, and resonate at the perfect frequency to destroy bacteria viruses, and yeast. These tiny “flashlights” circulate throughout every capillary in the body, disinfecting from the inside.

MAGNETIC DISRUPTION OF VIRAL DNA

A virus is constructed of a capsid that contains incomplete segments of DNA and RNA. These DNA segments carry a slight magnetic charge. There is a claw on the outside of the virus that attaches the virus to a healthy cell. Once the virus is attached to a healthy cell it can inject the incomplete DNA into the healthy cell, producing damage to the normal DNA and causing it to reproduce abnormally. This can cause viral disease like influenza, hepatitis, and cervical cancer. The new supercharged silver acts like a magnet that attracts the charged DNA particles. THE DNA binds so tightly to the silver that it makes a chaotic tangle of incomplete genetic material that can never lengthen out, so it can never go through replication. This inactivates the virus and prevents replication of viral disease. Normal cells have thicker, more protected cell membranes with a balanced charge which protects them from the silvers magnetic attraction.

CELLULAR COMMUNICATION

Most cells communicate through a sugary coating. This coating lets the cell know friend from foe. Silver has a ‘friendly’ sugar coating that allows it to positively communicate with cells, this way silver nano particles can enter into an abnormal cell and attack pathogens before they have a chance to replicate.”

IN SUMMARY The new super charged silver produces hundreds of times more health benefits at a much lower concentration of silver and is hundreds of times more efficient while being absolutely safe.

WITHOUT SILVER – Virus with unhealthy DNA attacks the healthy cell and attaches its claw like feet onto the good cell. The unhealthy cell then drills a hole into the healthy cell and injects it with abnormal DNA. The abnormal DNA replicates inside the healthy cells protective barrier and then ruptures and starts the process all over.

WITH SILVER –Silver has a magnetic force which attracts the magnetic strands of the Abnormal DNA (Bad Cells). Silver sol binds the strands of the BAD DNA CELL and inactivates the viral DNA. The magnetically bound abnormal DNA can no longer be injected into healthy cells and the silver continues to bind and inactivate any remaining viruses WINNING THE WAR. (The new silver’s resonant frequency is in the same range as the blue germicidal lights found in the hospitals.) Not only that the Silver Sol is like a machine gun with unlimited bullets. It just keeps firing away after the bad cells thus giving it the advantage over the bad guys. HOW AWESOME IS THAT????? Its chemical structure is unique in with each ion’s shell is missing two outer electrons, the supercharged silver RIPS ELECTRONS FROM THE THIN WALLED CELL MEMBRANES OF HARMFUL BACTERIA, rupturing the cells and causing their deaths. Finally, most cells have a sugar coating used in cellular communications that determines intercellular activity. Silver reacts positively with this sugar coating, this way the good cells know that this is a good guy come to help them and thus it then allows the silver particle to enter abnormal cells and destroy the pathogens. ONCE AGAIN THE GOOD GUYS WIN!!!! YEAH!!!!

There is so much to tell you about the insights I learned from Dr. Gordon Pedersen but you might all get bored. In closing! I will leave you with a few thoughts from the seminar:

1. “In Singapore Silver Gel healed 3x quicker on skin, much less scarring, and 3 x faster on wounds and the Chairman of the Food and Drug Board stated that it worked 3 X better than any other silver tested and any drug tested. AND they boiled the Silver and heated it at extreme heats prior to using it and it still contained its potency.
2. All Iraq troops now take a tube of Silver Shield Gel with them.
3. Stem cells must have Silver to transfer energy.
4. Silver Shield is MRSA, FDA and EPA approved and patented.

I have attached many reports on Silver Shield Sol Technology in addition I encourage you to go to U TUBE and listen to some of the interviews with Dr. Gordon Pederson.

Blessings to you all Kathy Deane nwhhi@junction.net

www.herbalistprograms.com

Recipes For Silver Shield Use

Uses from Dr. Gordon Pederson, developer of Silver Shield Silver Sol product. Dr Pedersen claims we could take a maintenance dose for the next 258 years and would not become toxic with the Silver Sol Technology. There's no fear of argyria (graying of skin).

Hand Sanitizer

Put Silver Shield liquid in an atomizer bottle for purse or pocket, or carry Silver Shield Gel with you in a small bottle.

Strep Throat Gargle

Use 1 teaspoon Silver Shield and gargle for 6 minutes, then swallow. Repeat every two hours first day and then 2 times daily after.

Ear Health

2-3 drops in each ear, keeping ear upward for up to 10 minutes to allow silver access into the ear cavity. Use 2-3 times a day if necessary.

Eye Health

Use 2-3 Silver Shield drops in eyes for up to 6 minutes for optimal exposure. Can use 2-3 times per day.

Ultimate level of extreme use for such as Malaria or Lyme's Disease - Adult

First day - 1 bottle (4 oz) sipped throughout day

Next 2 days - 1/2 bottle (2 oz) consumed each day

Next 4 days - 1/4 bottle (1 oz) consumed each day

Continue two weeks with 2 teaspoons twice a day. Total of 5 bottles.

For children, dose according to weight assuming above dosage is for 150 lbs.

Facial Toner

Mix 3 parts alcohol-free toner or witch hazel to 1 part Silver Shield. Shake before using. Spray on face before using makeup or before bedtime.

Facial Mask

Use your favorite dry powder mask and substitute 1 teaspoon Silver Shield liquid or gel for water in the reconstitution process.

Wound Management

Apply Silver Shield Gel several times a day

Vaginal Tampon

Purchase tampon and remove the individual paper wrapper. Holding the applicator upright, pour 1 oz. liquid Silver Shield down the applicator onto the tampon. Insert for 30 minutes, then remove.

Vaginal Douche

Lie on back. Pump 2 oz liquid Silver Shield into vagina and hold for 12 minutes, then release.

Fungal Nails

Use Silver Shield Gel topically and may benefit using liquid internally.

Gingivitis Mouthwash

Use 1 teaspoon Silver Shield 4x per day swishing for 6 minutes. Continue for 3 days. Reduce to 2x per day for 1 week and then once daily maintenance.

Household Use

Super

disinfects cutting boards, kitchen table, bathroom and kitchen counters. After cleaning, spray a light mist of Silver Shield and let air dry.

Skin and Feet

Use Silver Shield Gel topically on skin, feet, burns, skin irritations, rashes, fungal infections, diaper rash, etc.

Voice Spray

Put Silver Shield into a small purse-size spray bottle and use up to 10 times daily with 1-4 sprays each time.

Q. Can you use Silver Shield in a nasal spray for sinus problems?

A. Yes, you can. Here's information on some of the research:

Sinusitis and Rhinitis.

The method comprises the step of administering a silver composition, one to five times a day to the nose until there was a response. Six patients with nasal infections (four with sinusitis and two with rhinitis) were each treated with approximately two drops of a composition of the present invention comprising in their nasal passages three times per day. The patients showed full recovery within four days.

Question:

Can Silver Shield help with Pterygiums in the eye?

A pterygium is a growth of scar tissue and blood vessels on the sun-exposed surface of the eye usually in response to ultraviolet damage from the environment.

Seems scar tissue is what you'd have to focus on. Here's the specific paragraph:

"Besides suffocating unwanted invaders, colloidal silver also helps injured tissues grow back. It has been useful in cases of severe burns and broken bones. It reduces scar tissue and helps severe cuts and wounds heal faster. |

SILVER SHIELD: REVOLUTIONARY SILVER FOR THE BODY! Notes taken by Sharon Grimes

Dr. Gordon Pedersen (Ph.D. in toxicology with a Master's degree in wellness)
NSP Rochester Meeting, June 19, 2007

"Based on my research, I have found the new silver solution to be a safe and effective weapon against harmful yeasts, viruses, and bacteria. Its low concentration, high effectiveness, and lack of side effects make it an ideal supplement for the prevention and care of conditions associated with these pathogens."
Kenneth Friedman, Ph.D. (MIT), M.S. (MIT & Harvard)

"To date, there are no potentially pathogenic bacteria tested that... [this] product has not killed."
Dr. R. Leavitt, Professor of Molecular Biology and Microbiology
Brigham Young University

PART I – SILVER SOL^{TMTM} TECHNOLOGY

A sol is a colloid that has a continuous liquid phase in which a solid is suspended in a liquid.

Many people have used colloidal silver as a supplement for years, but with new technology comes improved science. Recent advances in silver technology have resulted in a silver solution that can be used in an effective daily regimen to prevent and kill bacteria, viruses, mold and food poisoning. It is safe enough to consume every day while powerful enough to destroy the causes of many serious diseases like strep throat, staph, pneumonia, salmonella, dysentery and yeast.

More men died from infections in the Civil War than they did from the wounds they recd in battle. In World War I & II, colloidal silver was used to treat the wounds to prevent infection.

When hospitals want to kill bacteria, they disinfect things; but even their fumes are toxic! When doctors want to kill things in the body, they use antibiotics. What if we had an internal disinfectant? Now we have a SAFE internal disinfectant, safe enough to take every day!

"Dis" means to kill

"Infectant" means something that infects us

A "disinfectant" is something that kills the things that infect us ---- and everything used in the hospital is toxic to the human system.

A first line of defense could be taken every day, providing prevention before you need a cure. It could prevent the need for antibiotics, could safely disinfect one cell at a time, could help antibiotics do their job better by reversing the damage caused by the antibiotic.

Kills bacteria in the body but protects probiotics

Helps improve wound healing

Kills candida without harming the good flora

Changes the way we treat TB and pneumonia and other diseases

Has been presented before congress as a new technology

It is a totally different chemical entity than colloidal silver water dispersion

When silver is subjected to tremendous amounts of energy it will actually dissolve into water. This produces a stable dispersion of solids in liquids, where the solids maintain a magnetic field; the solids are tinier than water particles and keep their charge while suspended in water – nano-particles.

This entire range of silver antimicrobial properties are patent-protected.

US Patent #7,135,195, Nov. 14, 2006

Yes - it is a PROVEN claim!!!

Elemental silver is used as the core silver nano particle and has a silver oxide coating which maintains a charged silver coat that has antimicrobial properties

Colloids, including metallic sols™ have been studied more than any other category of materials. Faraday pioneered the electrolysis of sols™; Svedberg, Perrin & Zsigmondy all won Nobel prizes studying colloids (2 in 1926); more.

Silver sol™ passes through the organs of excretion and disinfects them.

The name “colloidal silver” still applies to this technology but there is so much more to a silver sol™.

- Kills 99.99% of most bacteria, molds & yeasts within 10 minutes
- Continues to kill pathogens with catalytic, not chemical action
- Can be used internally as well as topically
- Has multiple mechanisms of action to ensure its efficacy
- Is non-toxic and safe at recommended levels

Safety: it would take 72 years to accumulate in your body if you took it daily (.005 mg/kg/day – one ounce) – even if NONE of it left your body!

90-95% of this silver is excreted out of the body on the second day

Non-toxic internal disinfectant – can be taken internally

In 1924 colloidal silver was patented, which expired 17 years later. Our silver is different because PURE silver is used, not 98% pure like people use in their home brews, which can cause significant accumulation of nickel and lead and other metals associated with impure metals. Homemade electrical devices produced silver water that was in the range of 300-3000 parts per million. Side effects began to appear with such inconsistent and high concentrations of silver developed in uncontrolled environments. New patented process supercharges the silver using >10,000 volts of AC vs. much lower voltage at home using DC.

While other silvers can kill bacteria at high concentrations and amounts, ours can kill them at very low concentrations and amount. It takes only a tiny amount (10 to 20 parts/million) to this supercharged silver sol™ to be effective.

US Patent claims: (download this patent in the NSP Advisor files or at the US Patent website)

Anthrax, yeast, TB, wounds, food poisoning, bubonic plague (killed in 2 min.), MRSA, (In Ireland, hospitals are being burned down because of MRSA), much more.

Story about the plague – 1/3 of Europe died from the plague, and when our product was tested on this pathogen, killed it in 1.4 min. 160x stronger solution of the pathogen was introduced, and our silver sol™ killed 99.99% in 2 minutes.

This plague lasted for 100 years, and those who survived it used SILVERware. Wealthy families gave their children silver spoons to suck on to protect them from the dreaded disease; this gave rise to the saying “born with a silver spoon in his mouth”.

Western settlers dropped silver coins into their wells and water barrels to keep the water potable, and dairy farmers often used silver milk pails to keep the milk from spoiling.

In the 19th century surgeons used silver sutures to close surgical wounds; prevented infection and sped up the healing process.

Most hospitals use silver-tipped Foley catheters to prevent urinary tract infection

Many stents and prosthetic implants are made from silver due to its bactericidal properties.

Combats malaria, fungal infections, bacterial skin infections

Respiratory, nasal, ear infections

Anti-viral properties – kills both types of virus and Hep B

First line of defense for our country – as an immune enhancing bio-defense product against bio-terrorism and SARS – recommended by former surgeon general of the AF, Paul K. Carlton. In 2003, Dr. Carlton drafted a letter to the US Dept. of Homeland Security recommending this new silver solution as an important resource in bio-defense against bio-terrorism and outbreaks of infectious diseases. According to Dr. Carlton, the aquasol™ technology “has undergone rigorous testing and has been found to kill anthrax, bubonic plague, hospital staph and SARS: while still being non-toxic to humans. In addition, Dr. Carlton wrote that the compound has been a protection against the bubonic plague. He wrote that the silver solution “has shown to be a proven, wide-spectrum anti-microbial/bio-decontaminant...that can be used to increase the safety and functionality of healthcare facilities in the event of a bio-terror attack or infectious disease outbreak such as SARS. In short, we currently do not have anything with such a wide spectrum of efficacy...in our inventory.”

The top infectious diseases in America are staph, strep, pneumonia, and MRSA (resistant staph) – these are the cause of

infections of the ears, nose, throat, lungs, bronchioles, eyes, skin, digestive tract and can be fatal...and prevented using your silver shield.

Staph before and after silver was applied (photos) – 1.4 min. to destroy – 1 u/m size

CDC has warned doctors to NOT prescribe any antibiotics for ear infections (Nov 2006) – “They only serve to make the problem worse” – the recommendation is to give analgesics and the ear infection should remedy itself in a few days or weeks.

Dr. Pedersen’s son Nikko was on continuous antibiotics for ear infections (6 heavy-duty drugs) for a number of years until he discovered silver sol™; now a teen with irritable bowel problems due to the damage caused to his intestines by the drugs.

Dr. Pederson felt as though he had swimmers ear one day describe the feeling – laid down and put in 5-6 drops per ear – by AM it was all cleared up. Lay on your side and point your ear to the ceiling and lay there ten minutes or so after applying the drops to allow the silver to trickle all the way down inside the inner ear.

70% of children have had an antibiotic for an ear infection by age 3, and over 90% by age 5 – use 4-5 silver drops in the ear twice a day – let it sit there for ten minutes. In about 6-10 minutes it will kill anything that is growing in there! Keep ear pointed to the ceiling.

Antibiotics are failing because the bacteria have become resistant – Current Science, 2006 – “this silver has helped reverse antibiotic resistance and made all categories of antibiotics more functional”.

Common sense medicine –

- Use 1 t. of silver daily because it is broad spectrum and kills bacteria, viruses and yeast
- If you are getting sick or going to be exposed, are under stress or at risk, take the preventative amount 2x/day
- If you are seriously ill – 3-4x/day

70% of all contagious diseases are obtained by hand contact; you could put this silver on your hands (spritz it on) and have protection for the next 4 hours.

Bottom of purses the second most germ-infected surface!!

Use silver for the prevention of STD’s (which are bacterial)

Soak a tampon in silver and insert it for 30 minutes; you can use an all-natural tampon product. (This would also be effective against yeast infections, bacterial vaginosis, toxic shock syndrome, HPV, etc.)

Many ways silver kills pathogens –

- Silver oxide kills on contact with the bacteria by pulling one electron off the thin-walled bacteria cell membrane and rupturing the bacteria cell in 6 minutes or less, and causing its death; photo of strep throat shown = red (bacteria) white (bacteria using healthy tissue for food) ; swish the silver in the mouth and kill the bacteria everywhere in your mouth, which will also help prevent heart disease!
- Magnetic viral DNA disruption – the magnetic charge of the silver acts on viral DNA; the magnetic attraction binds and incapacitates the abnormal DNA of viruses in direct contact or even in the vicinity of the silver; the silver nano particle keeps the DNA from multiplying and thus deactivates it.
- Unique resonance – the new silver resonates at between 890-910 tera hertz (nominated twice for the Nobel Prize); this is the same frequency that is used in labs to kill bacteria and viruses; if you go to a lab that works with bacteria or viruses, you will find strategically placed blue lights that resonate at 890-910 TH. Its resonant frequency is in the same range as the blue germicidal lights found in hospitals.
 - o NOTE: The frequency of silver affects the entire body even if it doesn’t touch the entire body. (DEMO with silver pendant/balance) – makes the other calls in the body follow. It is taken inside the red blood cells and transported throughout the body, killing as it goes.- like a bunch of supercharged flashlights safely disinfecting as they go throughout the body. Healthy and unhealthy frequencies (massage vs. jack hammers). “So safe you can drink it, yet so powerful it can kill the most dangerous bacteria known to man.” (Keith Moeller – who uses Colloidal Silver like Windex is used in “My Big Fat Greek Wedding”)
- Cellular communication – most cells have a glucose (sugar) coating used in cellular communication that determines intracellular activity. Silver reacts positively with the coating, allowing the silver particle to enter abnormal cells and kill the pathogens.

As an immune booster, there are over 80 published studies documenting the benefits to structures and functions of the body, (partial listing found on p. 3 in the Wellness Report)

What if you could save yourself from an MRSA infection? 51% of all staph infections are actually MRSA. You can

drink the silver sol™ and inhale it; take it every day and never feel sick again.

This is:

The vibration of truth - the resonance of a new silver shield!

PART II - Silver Shield Medical School – clinical evidence that Silver Shield kills bacteria, kills viruses, kills fungus, and improves wound healing

SILVER SHIELD KILLS BACTERIA

Bacteria: Acne (photos) – one application (squirt); 24 hours later visible improvement is seen; bacteria grow, multiply and destroy healthy tissue. Pimples are visibly smaller in radius and flat to the skin; puss center is gone.

Photo of Cystic acne – leave deep scars – one treatment & 24 hours later – shrinks 50% and nearly flat to the skin, demonstrating we are killing the cause of acne; imagine doing it twice a day and continuing for a week.

Photo of MRSA being killed by silver sol™

Photo of ankle sore, treated for 7 years with everything but silver; ready to amputate; begin using silver 2x/day, internal and spray – soaking a gauze pad and leaving it on the wound; by week 2, 45% improvement; week 3, 71%; week 4, 80%, week 5, 90%; week 6, totally closed over and healing!! No amputation necessary!!!!

Diaper rash – can be turned around in 3 hours – spray the silver solution directly on the rash

Voice Spray – reduce the bacteria that causes sore throats with a liquid spray bottle: 1-4 pumps, 1-10x/day. Gargling or swishing the silver sol™ for 6 min. keeps the silver in contact with the pathogens long enough to kill the bacteria.

Eye or ear infections – 4 drops of silver in the eye or ear for at least 10 minutes at a time, 2x/day

Sinus infections – 1-4 nasal pumps, 1-10x/day

Silver Sol™ is the first line of defense against bacteria – kills the following pathogens with concentrations noted (in parts per million)

MRSA/Staphylococcus aureus (bacteria) – pneumonia, eye infections, skin infections, meningitis, toxic shock syndrome, food poisoning – 2.5 - 5 PPM

H. Influenza (bacteria) – ear infections, pneumonia, meningitis, throat and sinus infections – 1.25 PPM

Y. Pestis (bacteria) - bubonic plague – 5 PPM

Strep pneumoniae (bacteria) – pneumonia, meningitis, sinusitis, otitis media – 2.5-5 PPM

Strep pyogenes (bacteria) – strep throat, impetigo, scarlet fever – 1.25 PPM

Pseud. Aeruginosa (bacteria) – burn & wound infections, meningitis, pneumonia, UTI – 2.5-5 PPM

Strep mutants (bacteria) - tooth decay, dental plaque – 5 PPM

Salmonella (bacteria) - food poisoning, fever – 2.5-5 PPM

E. coli (bacteria) - food poisoning, diarrhea – 2.5 – 5 PPM

Influenza A (virus) – flu – 10 PPM

Hepatitis B (virus) – hepatitis – 10 PPM

Candida albicans (mold/yeast) – vaginal and intestinal yeast (5 PPM)

OUR SILVER SOL™ PRODUCT CONTAINS 14 PPM – so it will do all of the above!!!

Can kill bacteria in as little as 1.4-45 min. – can be delivered orally, gel, ear/eye drops, inhaled, topically, intranasal (1-4 pumps prior to air travel), throat spray, in and on wounds.

Pour silver into a nebulizer cup; inhale the mist for 30 minutes, and you coat the inside of the lungs to prevent or cure anything that is in the lungs – do not dilute

For a CPAP machine – dilute 3:1

Nebulizer (inhaler) 50% off for NSP members – see info at the end of note section

VP of the US requested Dr. Pederson to send a protocol for XDR-TB to CDC. “The active ingredient is a silver aquasol™ (US Patent #7,135,195) which kills tuberculosis.

- Drink a 1-ounce dose
- Immediately following the oral, begin the inhalation of 1 oz. of silver aquasol™ (liquid from a nebulizer)
- Do this 2-3x a day

SILVER SHIELD KILLS VIRUSES

Viruses – kills both forms, including ebola and HPV (cervical cancer)

100% improvement in ability of mice to survive a fatal bird flu infection

Dr. Rustom Roy, Current Science Investigation Journal, 2007 (quote)

SILVER SHIELD KILLS FUNGUS

Fungus – timber wolf with mouth and snout infections (LOBO, Disney movie); losing fur around now, Dr. Pedersen treated with colloidal silver with fast and excellent results! Safe for use with animals

Fungus – app. 25% of all missed days for military comes from foot fungus – the military issues soldiers' socks and undergarments woven with silver to reduce odor and prevent infection in the field.

Out of control – can lead to fibromyalgia symptoms

Toenail fungus – afflicts 25% of adults; can cause systemic problems if it gets in your blood stream

- Liquid silver needs to be in contact with the fungus for ten minutes to kill it, needs to get below the nail
- Create a toe dressing
- Scrape or sand the top shiny layer, which makes it porous
- Soak a 1/2 inch thick cloth in silver
- Tape it over toe so the liquid can soak into the nail
- Tape a little baggie around it so it doesn't leak; leave for at least 30 minutes (overnight is even better)
- (Silver Toe Dressing) – the dark fungus will be lighter; will come back in 48 hours; so do this every other day until the toe nail grows out
- 3x/week – Silver Toe every other day

Silver must be in contact with fungus to kill it.

Silver can kill candida without killing probiotics – yogurt experiment proves that the yogurt starter will still work even when silver sol™ is added to it.

SILVER SHIELD IMPROVES WOUND HEALING

Wound Healing – Injuries, wounds, infections all compromise the immune system inviting potential complications

The immune sys focuses all its energy on isolating, destroying and removing a pathogen

Reduces inflammation and pain; reduces the time to heal serious wounds by half

Half the time, half the scar, half the cost, ten times the benefit!!!

Inhibits pain receptors to reduce pain; silver is often woven into cloaks for racehorses to relieve aching muscles.

Wound demonstration – Dr. Pederson suffered a facial trauma that resulted in 15 stitches to his right eye, stitches on the forehead, and tightly swollen, badly bruised tissues around the right eye, with migrating bleeding/bruising across the bridge of the nose and over to the left eye. Doctors told him it would take 2-3 weeks to heal. He applied:

- Silver – Topical 4x/day (soaked gauze pad over the wound)
- Silver – Internal 2x/day (1 ounce)

Showed photos of Day 1 through Day 6 – each day showed amazing improvement and on day 6 it was barely noticeable that he had ever had an injury. His doctor said it healed twice as fast, or maybe even three times faster, than any other wound like it, with no infection, and no pain!!!!

Wounds heal twice as fast because the immune system does not have to fight the infection first – burns, cuts, infections, radiation burns, many more on list.

Bacteria do not mutate to destroy its activity – no resistance like there is to antibiotics

Thus, it increases the efficacy of antibiotics ten-fold.

Need: delivery systems for the mouth, nose, ears, eyes, lungs, rectum, vagina and others

Solution: nasal and skin spray bottle, ears and eye dropper bottle, throat spray bottle, nebulizer (combinations of delivery methods often help improve healing times, because, until you kill the pathogens, healing cannot take place.)

Q & A – will our colloidal silver help...

Cancer – if caused by bacteria or viral

Parasites – to a minor degree, some limited benefit

Psoriasis – bleeding and painful; helps clear it up by keeping it moist – use the spray 10 times a day and drink 2x a day

Lyme – bacterial; 4x the normal dose plus every other application; intranasal

Epstein Barr Virus – intranasal and oral

Herpes – apply to cold sore with paper towel topically, may turn red but will not erupt; will suppress it. Take orally as well; apply with bandaid to any part of body where there is a herpes eruption

High BP – may help reduce inflammation

Macular degeneration/glaucoma – reduce inflammation – need to penetrate the eye, so minor benefits only may be seen

Dental office water supply contamination (15 gallon holding tank behind the dentist chair – add colloidal silver to the water to kill bacteria!)-
To take it into the hospital for patient consumption --- mix it in water and transport in a Styrofoam cup with a lid and straw

Don't use large doses for longer than 2 weeks at a time
Shelf life is 8 years

Thank you to Sharon Grimes Regional Manager for these notes:
