**Nature's Sunshine Silver Shield Aquasol Silver Technology!**

Dr. Gordon Pedersen informs us we now have “A **FIGHTING CHANCE**” against **Bacteria, Viruses, Molds – even against various types of parasites** AND he tells us how to ‘**MAN OUR WARRIORS INTERNALLY**’ so we can ‘**WIN THE WAR!**’

*Dr. Pedersen's book is available by calling 1-888-225-6601*

In his book on A Fighting Chance Dr. Pedersen explains the following;

1. Silver Aquasol, is silver particles dispersed in purified water and the term sol literally means a pure mineral permanently suspended in water where the mineral's charge is transferred to the entire body of water.
2. How is Silver Aquasol different to colloid and ionic silver?
  - a. Silver Aquasol technology sometimes called Silver Sol is different to the colloid and ionic silver in that it is charged with Alternating Current (AC) volts of 10,000 – 11,000 the old colloids used only 110 volts. AND----The new Silver Aquasol has two electrons where the old colloids have only one.
  - b. Did the colloid silver work with only one electron? Yes we had some positive reports on what the colloidal silver could accomplish – however we also heard downsides of it for example that after long term use a person's skin would appear a silver/grey color and the body would become toxic from overuse. These types of testimonies along with the silver not staying suspended permanently in water brought about some negative undercurrents with the use of colloidal silver where only 110 volts of AC was used.
  - c. With Silver Aquasol Technology – Dr Pedersen claims you could take a maintenance dose for 258 years and your skin would not become discolored or toxic. In other words he says, “it is safe to use daily.”
3. What does it mean with the new Silver Aquasol having two electrons in comparison to the old Colloidal Silver having only one
  - a. “The common colloid is missing one electron in its outer shell, which is why it will work - it can remove an electron from the bacteria, destroying the bacteria.” However it would be like two warriors fighting with swords and the good warrior knocks out the bad warrior's sword and the battle continues back and forth at about that speed.
  - b. Now “Silver Sol is an AG 404 which means that it is missing two electrons in its outer shell. This means that Silver Sol has catalytic capabilities. (Catalytic means that while one electron is destroying bacteria, viruses and mold, the other is being recharged.)” Yep you got it! It is like the bad guy coming at you and you have now graduated from a sword to a gun and you hold your gun of Silver Sol up to the bad guy(s) and start shooting. Now your gun is not just an ordinary gun it is a gun that shoots repeatedly. The bad guy has no choice but to die. Because the Silver Sol has 2 electrons it just keeps recharging and shooting. Dr. Pederson says, “It is like a rapid-fire machine gun. The result is that Silver Sol can destroy thousands of times more pathogens than simple colloid or ionic silver. This means that Silver Sol can be much more effective at a very safe concentration of 5 – 20 parts per million (ppm), which can be potentially consumed every day.”

4. **Does Nature's Sunshine carry this Silver Sol Aqua technology** in product form in the 5 – 20 ppm range. **OF COURSE! Nature's Sunshine new Silver Shield has 18ppm and has the new Silver Sol Aqua Technology. YES! YES! YES!**
  
5. Does this new Silver Sol technology bother our good cells while it is wiping out unwanted bacteria, moulds and viruses?
  - a. Dr. Pedersen says no it does not harm good cells! The cells in our body communicate via a sugary coating. In other words they have the ability to 'talk back and forth'. Well! Guess what the Silver Sol has??? That's right – it also has a sugary coating so chats back and forth with our cells. It will not harm our good cells! Once it has positively communicated with our good cells via way of its "friendly sugary coating" then the silver nano particles enter into a abnormal cell and attack the 'bad guys' before they have a chance to reproduce. Remember the Machine Gun effect? That is what is happening now!
  
6. Is it good to put Silver Shield into our drinking water for protection?
  - a. Good Question – Yes absolutely. In 1999 at Provo Utah a 10ppm of Silver Solutions were put into 50 gallons of contaminated RAW SEWAGE containing the forever unwanted E.coli cells which contained 7,000 E. Coli per million in this water not to mention whatever else. After only three hours of being flushed with silver electrodes, the sewage was contamination free.
  
7. Does Silver Shield keep for a long time? Dr. Pedersen believes every household should be stocked up on this Silver Product to have on hand for emergencies, water purification and for daily maintenance usage. He also states, "it will keep for up to 10 years."
  
8. Is it true that the Silver Shield Aua Sol Technology wiped out the virus bubonic plaque and the MRSA that is so prevalent in hospitals?
  - a. Dr. Gordon Pedersen stated that this special patented colloidal silver with its Aquasol Technology, (*that you find also in Nature's Sunshine' Silver Shield'*) worked in 1.2 minutes against the bubonic plague. In the lab they used 160x more plague cells than normal and it killed off 99.9%. This plague killed off over 1/3 of the entire population of Europe. We have modern day plagues ... MRSA (staph infections). Antibiotics are not helping and people are dying." Dr Pedersen stated , "that theMRSA (staph)" was wiped out. **SILVER SHIELD: REVOLUTIONARY SILVER FOR THE BODY!**
  - b. Dr. Gordon Pedersen (Ph.D. in toxicology with a Master's degree in wellness) NSP Rochester Meeting, June 19, 2007
 

"Based on my research, I have found the new silver solution to be a safe and effective weapon against harmful yeasts, viruses, moulds, and bacteria. Its low concentration, high effectiveness, and lack of side effects make it an ideal supplement for the prevention and care of conditions associated with these pathogens."
  - c. Kenneth Friedman, Ph.D. (MIT), M.S. (MIT & Harvard)
 

**"To date, there are no potentially pathogenic bacteria tested that...[this] product has not killed."**

**9. Where can I purchase this product? Contact your Distributor for Nature's Sunshine and/or I Kathy Deane at 250 547 2281. If you are a Distributor or a Preferred Customer you can order direct from Nature's Sunshine. by calling 1 800 265 9163 . If you want to become a Distributor for this product or become a Preferred Customer so that you can receive discounts then Contact us and let us get you signed up today!**

**1. Silver Shield Liquid # 14362-7 4 Pak (Great as a Family Pak)**

PV	Manager	Business Assoc	P/C	Retail
\$88.92	\$88.92	\$95.27	\$107.97	\$127.03
