

Nature's Sunshine Silver Shield The Super Hero to Combat Germs

Silver Shield (4 fluid oz.) Stock #4274-1

Silver Shield Gel Stock # GEL 85ML Stock No.: 4950-1

SILVER SHIELD: REVOLUTIONARY SILVER FOR THE BODY!

Dr. Gordon Pedersen (Ph.D. in toxicology with a Master's degree in wellness)
NSP Rochester Meeting, June 19, 2007

“Based on my research, I have found the new silver solution to be a safe and effective weapon against harmful yeasts, viruses, and bacteria. Its low concentration, high effectiveness, and lack of side effects make it an ideal supplement for the prevention and care of conditions associated with these pathogens.”

Kenneth Friedman, Ph.D. (MIT), M.S. (MIT & Harvard)

“To date, there are no potentially pathogenic bacteria tested that...[this] product has not killed.”

Dr. R. Leavitt, Professor of Molecular Biology and Microbiology
Brigham Young University

Dr. Gordon Pedersen stated that this special patented colloidal silver worked in 1.2 minutes against the bubonic plague. In the lab they used 160x more plague cells than normal and it killed off 99.9%. This plague killed off over 1/3 of the entire population of Europe. We are going to have modern day plagues ... and we suffer a modern day plague now with MRSA (staph infections). Antibiotics are not helping and people are dying. And guess what Nature's Sunshine is the only way we can get this patented form. Wow!

This substance has been presented to Homeland Security by Senator Orrin Hatch. General P.K. Carlton, MD, the Director of Integrative Center for Homeland Security has stated in written form,

"I would like to bring to your attention a resource that I feel can be used and utilized in the area of bio-defense from bio-terrorism to infectious diseases such as SARS. The ABL antimicrobial has undergone rigorous testing and has been found to kill anthrax, bubonic plague, hospital staph and SARS. It's the first new antimicrobial for the hospital in many years. In addition the product is non-toxic to humans, this product is EPA approved for hospital staph and bubonic plague and currently awaiting section 18 approval for anthrax. In short, we currently do not have anything with such a wide spectrum of efficacy in our inventory. As such, I recommend that the antimicrobial be evaluated for addition to the national pushback stockpile."

What Colloidal Silver Does

How does silver work? It disables the enzyme that one-celled bacteria, viruses, and fungi need for oxygen metabolism. In the presence of silver, these pathogenic microbes suffocate.

Dr. Pederson in his book ‘A Fighting Chance – How to Win the War Against Bacteria, Viruses & Mold With Silver, on page 13 states, “Silver Sol is an Ag 404 which means that it is missing two electrons in its outer shell. This means that a Silver Sol has catalytic capabilities. Catalytic means that while one electron is destroying bacteria viruses and mold, the other is being recharged. This catalytic conversion allows the Silver

Sol to destroy then instantaneously recharge and: kill: again and again – like a rapid fire machine gun. The result is that Silver sol can destroy thousands of times more pathogens than a simple colloid or ionic silver. This means that Silver Sol can be much more effective at a very safe concentration (5-20 parts per million), which can be potentially consumed every day.” And this product is only available through Nature’s Sunshine.

In one powerful experiment, 50 gallons of raw sewage were pumped into a pool without any disinfectant. The E. coli count (a standard measure of contamination) was at 7,000 E. coli cells per milliliter of water. The water was exposed to silver electrodes and within three hours, all 50 gallons were free of E. coli.

Silver Shield Colloidal silver is an effective ally in the fight against over 650 disease-causing organisms. These include: bacteria (typhoid, diphtheria, certain types of food poisoning, and pneumonia); viruses (the common cold, influenza, and measles); protozoa (malaria, giardiasis, amebic dysentery); fungi (ringworm, thrush, candida albicans, and athlete's foot); rickettsiae (rocky mountain spotted fever and Q fever); and chlamydiae (infections of the eye, the genitals, and the respiratory system). There is no known microbe that colloidal silver does not destroy.

It turns out that silver ions are very important for the immune system. They supplement and support the T-cells in fighting foreign organisms, almost forming a second immune system. In research done with AIDS, it appears that silver both protects and defends T-cells, and does their work for them. There is also a correlation between occurrence of illness and the level of silver in the body; people who are ill generally register lower levels of silver in their body.

Besides suffocating unwanted invaders, Silver Shield colloidal silver also helps injured tissues grow back. It has been useful in cases of severe burns and broken bones. It reduces scar tissue and helps severe cuts and wounds heal faster.

Silver vs. Antibiotics

An antibiotic kills a half-dozen different disease organisms. But because the antibiotic attacks the bacteria directly, and because bacteria adapt very well, they mutate to over-come the antibiotic. So every time an antibiotic is used, it becomes less effective for the next time it is needed.

But silver kills over 650 disease causing organisms, and it can do so every time. No resistant strains develop with the use of silver. Researchers speculate that this is because silver does not attack the microbe directly like an antibiotic does. It decomposes the enzyme microorganisms rely on to breathe-they can't mutate to counterattack silver's approach.

Another problem with antibiotics is that they kill beneficial enzymes while attacking the bad ones; pharmaceutical antibiotics can't distinguish between good and bad enzymes. This is why the immune system is especially weak after a round of antibiotics, and why yeast infections are much more likely after taking antibiotics.

Silver, however, doesn't destroy beneficial enzymes because they are very different from the enzymes of single-celled life which silver targets. Silver is nontoxic. Also, colloidal silver doesn't interact or interfere with other medicine being taken.

Nature's Sunshine's new and improved Colloidal Silver Shield offers more silver: you now get 70 micrograms **(14 ppm of silver that stays suspended in purified, deionized water)**, instead of 25 micrograms (5 ppm).

Higher concentrations found in other brands (as much as 30 ppm) can separate and settle at the bottom. Moreover, prolonged use of higher concentrations may cause a gray discoloration of the skin and inner eyelid inflammation.

Recipes for Nature's Sunshine Silver Shield and Silver Shield Gel

Ear Health

2-3 Silver Shield drops in each ear, keeping the ear pointed up for 10 minutes. Use 2-3x a day if necessary.

Eye Health

Use 2-3 Silver Shield drops in eyes for up to 6 minutes for optimal exposure. Can use 2-3x per day.

Facial Mask

Use your favorite dry powder mask and substitute 1 teaspoon Silver Shield liquid or gel for water in the reconstitution process.

Acid Reflux

Take 1 – 5 tsps a day of Silver Shield to assist with the healing of the burn caused from acid reflux. In addition supplement diet with acidophilus and zymes.

Anti Tumor

Drink 4 oz of Silver Shield liquid a day, sipping the Silver Shield every hour for the first 4 – 8 hours. Drink two ounces a day for the next five days – with two tsps in the am and 2 tsps pm./ Apply topically Silver Shield Gel 2 – 3 times a day to the tumor. In addition follow Donna Roths Cancer Prevention program.

Anti Bacterial

For prevention drink 1 tsp of Silver Shield AM and 1 tsp of Silver Shield PM. If Bacterial infection exists double the dose.

Facial Toner

Mix 3 parts alcohol-free toner or witch hazel to 1 part Silver Shield. Shake before using. Spray on face before using makeup or before bedtime.

Anti Viral

By taking 2 tablespoons of Silver Shield in the morning and at night Dr. Pedersen states, “you can potentially defeat an existing viral infection.”

Yeast

Intestinal or Vaginal Yeast drink 2 tsps in the morning and 2 tsps at night. Half the dosage can be taken for prevention. In addition one should adjust their diet to yeast and sugar free, include fiber such as Psyllium Hulls Combination, Acidophilus and incorporate enzymes.

Wound Healing

Apply Silver Sol Gel 1 – 4 times a day and drink 2 tsps of Silver Shield 2 times a day.

Gingivitis Mouthwash

Use 1 teaspoon Silver Shield 4x per day swishing for 6 minutes. Continue for 3 days. Reduce to 2x per day for 1 week and then once daily maintenance.

Household Use

Super disinfects cutting boards, kitchen table, bathroom and kitchen counters. After cleaning, spray a light mist of Silver Shield and let air dry.

Skin and Feet

Use Silver Shield gel topically on skin, feet or nails for burns, skin irritations, rashes, fungal infections, diaper rash, etc.

Hand Sanitizer

Put Silver Shield liquid in an atomizer bottle for purse or pocket, or carry Silver Shield Gel with you in a small bottle.

<p>Strep Throat Gargle Use 1 teaspoon Silver Shield and gargle for 6 minutes then swallow. Repeat every two hours first day and then 2x daily after.</p>	<p>Voice Spray Put Silver Shield in an atomizer bottle and spray 1-4 times for each application up to 10 times a day.</p>
<p>Wound Management Spray 50% Silver Shield 45% Aloe Vera 100% pure gel 5% Olive Oil (100% Pure)</p> <p>Put in spray bottle, shake well, and dispense as needed. Silver Shield n place of this.</p>	<p>Vaginal Use For a douche: Lay on back. Pump 2 oz. Silver Shield into the vagina and hold for 12 minutes, then release.</p> <p>Use Silver Shield Gel on vaginal area or use atomizer to spray Silver Shield liquid</p>
